

Divye Maingi

Full Stack Web Developer

LinkedIn: [Linkedin](#)
GitHub: [Github](#)

Email: divyemaingi88@gmail.com
Mobile: +91 - 7901842930

SKILLS/SUMMARY

Languages: C++, Java, JavaScript, Python

Tools/Platforms: Git, GitHub, Docker, AWS, Vercel, MongoDB, PostgreSQL, Redis, Postman, Nginx.

Soft Skills: Problem-Solving, Team Collaboration, Time Management, Multitasking, Self-Learning.

PROJECTS

- DevHub – Developer Social Platform | [Github](#) Aug' 2026
 - Built a production-grade developer platform with layered architecture and strict TypeScript.
 - Implemented secure authentication with HTTP-only cookie-based JWTs and centralized Zod validation.
 - Integrated Socket.io for real-time 1-on-1 messaging, presence detection, and instant event-driven notifications.
 - Containerized the multi-service stack using Docker Compose and added Redis caching.
 - Tech used – Next.js, Express.js, TypeScript, MongoDB, Socket.io, Redis, Docker, Tailwind CSS
- Snitch – Full-Stack E-Commerce Platform | [Github](#) Jul' 2026
 - Engineered a scalable full-stack e-commerce application with a modern, responsive UI built on TailwindCSS.
 - Implemented secure user authentication supporting both traditional email/password (with bcrypt hashing and JWT) and seamless Google OAuth integration via Passport.js.
 - Integrated Razorpay payment gateway to facilitate secure and reliable end-to-end checkout processing.
 - Optimized storage by utilizing Multer for parsing data and seamlessly uploading assets to ImageKit.
 - Architected centralized global state management leveraging Redux Toolkit for efficient data flow.
 - Tech used - React, Node.js, Express, MongoDB, Redux Toolkit, Razorpay, ImageKit, JWT, OAuth 2.0.
- AI Chat Assistant | [Github](#) Jun' 2026
 - Engineered a full-stack MERN chat application with JWT-based authentication, enabling secure, persistent multi-conversation history per user.
 - Implemented a Retrieval-Augmented Generation (RAG) pipeline using ChromaDB, chunking and embedding.
 - Built a real-time streaming chat interface using Server-Sent Events (SSE), reducing perceived response latency by delivering tokens incrementally instead of after full generation.
 - Designed a provider-agnostic adapter pattern to support multiple LLM backends (Claude, GPT, Gemini).
 - Tech used - MongoDB, Express, React, Node.js, ChromaDB, JWT, Tailwind CSS, Zustand

TRAINING/ EXPERIENCE

- Lovely Professional University | Artificial Intelligence: From Basics to Agentic AI Jun' 2026 -Jul' 2026
 - Learned core AI concepts including embeddings, vector databases, prompt context.
 - Gained practical experience in integrating AI models into web applications and building user-friendly features.
 - Developed a full-stack AI Chat Assistant using the MERN stack with secure JWT-based authentication.
 - Built a RAG pipeline to process uploaded documents and deliver context-aware AI responses.
 - Implemented MongoDB conversation storage and ChromaDB vector search for persistent chats.

CERTIFICATES

- Oracle Data Platform 2025 Certified Foundations Associate | [Oracle](#) Sep' 2026
 - Decode Dsa with C++ | [PW Skills](#) Feb' 2026
 - Web Development | React | [Coding Ninjas](#) Mar' 2025
 - Java Programming | [Coding Ninjas](#) Aug' 2025

ACHIEVEMENTS

- Solved 350+ problems on [Leetcode](#) and [GFG](#) mastering data structures and algorithms(DSA). Since Aug' 2024 - Present
 - Event Manager at Coding Blocks Club, supporting event planning and driving effective communication for multiple student-led events. Aug' 2024 – Mar' 2025

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering ; CGPA: 8.91
Aug' 2024 – Present

Police D.A.V Public School Jalandhar, Punjab
Intermediate; Percentage:90%
Apr' 2022 – May' 2023
